

Enterprise Project Management

How are your important projects and programs being managed today? Are they being professionally managed to ensure on-time and on-budget delivery?

If not, you must consider the following challenges:

- Internal staff resources may not have either the time or the expertise
- Departments may have competing agendas
- Communication channels may be weak and ineffective

Problems can quickly arise resulting in unplanned delays. Getting off-track will increase budget and time to completion both of which are unacceptable and pose great risks to your company.

Our Enterprise Project Management Team offers you an efficient and effective solution providing a solid foundation for IT Transformation by establishing an environment of Project Management professionalism and excellence where:

- Project success is the norm
- Internal customers reap the benefit of a carefully planned investment
- External customers win through improved services or lower costs

We understand that Program and Project Management are critical to an organization's IT Governance framework. As IT organizations face an ever-increasing pace of change and are being asked to do more with less, it is more important than ever before to have an established

program and project management framework in order to achieve on-time delivery of quality technology solutions.

Our Enterprise Project Management practice is focused on providing you with timely accurate data to support program and project success. Our suite of full-service solutions includes:

- Program/Project Management Office (PMO) Implementation Framework
- Certified Project Management Professionals
- Project Management Methodology Implementation
- Portfolio Management

Our team is PMP, ITIL and CIPP certified and well-versed in waterfall, agile, scrum, and other leading methodologies. We have project experience involving Sarbanes/Oxley, Six Sigma and CMMI with a proven track record of success. We are creative, nimble, thorough, and we work hard to achieve your objectives on-time and on-budget.
