

Technology Assessments

Is your current technology environment old, outdated or misaligned unable to meet the needs of your business? Do you know where your greatest risk lies?

You need:

- To know what's working and what's not
- To implement best practices into your technology
- A comprehensive report of findings in order to bring your technology up-to-date

Our Technology Assessments cover all areas of Information Technology. We have significant experience and specialized staff to complete essential IT assessments as your needs dictate.

We specialize in the following assessments:

- IT Staffing
- Budgetary
- Network
- Technology
- Application Assessment
- Infrastructure Assessment
- IT Tools Assessment
- Software and Hardware

Our proven methodology ensures client success. We work with input from the your appointed staff as we perform a high-level inventory and rationalization of the selected environment(s).

Our recommendations include type and location usage, modifications or replacement along with a strategy for future usage of each entity and focused around the areas of:

- Continued utilization
- Expanded usage
- Consolidation
- Obsolescence

The in-depth review produces a Gap Report listing entities identified within the study but not listed on the inventory provided by the client. Additionally, your assessment will make recommendations on timing for implementation, estimated costs and your risks of not implementing a change. Our comprehensive report includes:

- Current State (AS-IS)
- Strategy Development
- Roadmap Development
- The Target State (TO-BE)
- Gap Analysis
- Project Planning
- Execution and Deliver

Our Technology Assessments will provide you with valuable insights, best practices and recommendations allowing you to eliminate known IT risks and avoid unexpected costs as you move forward to effectively compete in today's marketplace:
